EXPERIENCE

KPIT Technologies LTD, Pune - SDE Intern
(June 2021 - December 2021)

- Developed and launched a web portal from scratch for testing new hires in the company which can serve up to 4000 students at a time.
- Used Gitlab APIs for auto group and project creation, giving access of projects to specific users and revoking it, auto account creation on gitlab, etc in the portal.
- Being a POC ensured smooth communication between vendor outside the company and the current working team for KPIT NOVA and KPIT Shodh and managed to complete the projects within 28% less time than the deadline.
- Developed a multi-purpose bulk emailer that can send up to 1000 emails at a go using a private SMTP server for company usage.

PROJECTS

Library Management System

- A management system for libraries using NodeJS and MongoDB which can handle transactions of books in the library.

A Website for latest news

- Used “News Api” for fetching latest news from different sources and displayed them on website.
- Implemented Google OAuth for login and had a feature of saving articles for a specific user.

Other Projects

- A Blogging Website,
- A Web App for To-Do's,
- A Discord Bot,
- Some static websites including personal portfolio.
